DEMO – ILLUSTRATIVE

THE RIVALRY IN NUMBERS

Springboks v All Blacks — the two most followed rugby properties on earth arrive at the 2026 tour with a combined social footprint north of 15 million. Both sides shown as public-profile estimates pending federation consent.

PROPERTY		INSTAGRAM	FACEBOOK	X	TIKTOK	TOTAL FOOTPRINT
1	All Blacks EST	2.6m	5.1m	1.3m	1.1m	10.1m
2	Springboks EST	1.2m	3.1m	1.1m	350k	6.0m

+15%

Modelled follower lift for the home property across a three-Test home tour window (EST · MV-1.3)

R48m

Illustrative earned-media corridor for tour sponsors across owned & earned social (EST · demo figure)

105 yrs

Of rivalry since 1921 — the longest-running premium content asset in SA sport

All values modelled (EST) at methodology MV-1.3. Demo edition — figures are illustrative, not measured data. Production reports carry verified pulls where rights holders have connected.

DEMO – ILLUSTRATIVE

TOUR ASSETS — WHERE THE VALUE SITS

Blink-and-you-miss-it moments carry rand values. Illustrative media-value corridors per tour asset, owned & earned social, three-Test window.

ASSET	OWNER	WINDOW	MEDIA VALUE (EST)
1 Front of jersey — home Tests EST	Rights holder	3 Tests	R18.4m
2 Match-day content series — both codes' athletes EST	Athletes & unions	Tour month	R9.2m
3 Stadium LED + broadcast-adjacent social EST	Venues	3 Tests	R7.8m
4 Captain's-run & behind-the-scenes reels EST	Unions	Tour month	R6.1m
5 Fan-cam / crowd UGC amplification EST	Earned	Tour month	R4.9m

Corridors are P25–P75 modelled estimates in rand (EST · MV-1.3), anchored to the 2022 Springbok PR rate card and refreshed against live deal data in production. Demo edition — illustrative.

METHODOLOGY & THE ASK

How Inani puts a number on it — and what rights holders get when they verify.

- **Verified** figures come from read-only pulls via official platform APIs under owner-granted OAuth (POPIA s11(1)(a) consent, revocable, deleted within 90 days of revocation).
- **EST** figures are modelled from public profiles at methodology MV-1.3 — every estimate labelled, every figure timestamped with its source.
- Value = $(\text{followers} \div 1,000) \times \text{code rate} \times \text{tier weight} \times \text{engagement modifier}$, calibrated against real SA deal data and priced in rand.
- No AI logo detection. No broadcast tracking. No fabricated live data — this demo edition is explicitly illustrative.

Verify

Rights holders who connect turn EST into VERIFIED — and verified data converts sponsor enquiries 3× better.
